

psPipe™ Achieves MyHIJAU Certification

We are pleased to announce that the psPipe™ is now qualified under **MyHIJAU** Mark (Product Certification No. MYHP00102/18). **MyHIJAU** is Malaysia's official green recognition scheme endorsed by the Government of Malaysia (Ministry of Energy, Green Technology and Water), bringing together certified products and services that meet local and international environmental standards under one single mark.

For more than two decades, Fast Flow has been leading the world in providing innovative solutions and products in rainwater drainage technology. Every project completed by Fast Flow achieves the exciting specifications and derives the premium of cost saving, green building lifecycle, unique architecture and engineering fulfilment.

*“Being **green**” is a concept that we’ve applied to our work since the day we started, except that it was simply called technical and cost efficiency” says Colin Thoms, CEO. We are now bringing our green concept to the next level in the international stage after our solutions are recognized by professionals and governing bodies around the region.”*

The green panache  on our logo symbolizes our achievement in creating green technology to enhance sustainability in a building. We are proud to be the first rainwater management systems provider in the region to have an entire range of UPVC pipe products certified by the **Malaysian Green Technology Corporation (GreenTech Malaysia)** and **Singapore Environment Council (SEC)**.
